Professional Summary

I'm a former Marine Engineer with over 5 years of experience working onboard international vessels. I shifted to a web development / programming career because I like technical work and I like working in front of a computer.

I'm currently enrolled in a full stack web development bootcamp in Uplift Code Camp which started last February and will end in August.

I have good troubleshooting and problem-solving skills, good attention to detail and I'm a quick learner. I'm the type of person learns a lot by actually doing the job. I am always willing to be trained and I am able to absorb the knowledge given to me and be able to apply it on the job.

Skills

- HTML
- CSS
- JavaScript
- React
- Redux
- Git
- Responsive Web Design

Experience

2015-04 – 2020-12

Officer-In-Charge – Engineering Watch

BW Shipping Philippines, Inc.

- In charge of maintenance, overhauling, repairing, and carrying out tests of marine equipment and machineries in order to keep them at 99% efficiency.
- Preparing requisition orders of needed spare parts of machineries while also ensuring that costs are economically sound.
- Supervise and train other crewmembers during routine and emergency duties.

Education

2021-02 – Present

Full Stack Web Development Course

Uplift Code Camp

- Coding bootcamp focusing on the MERN Stack. I'm currently learning Express.js and MongoDB.
- My projects made here so far can be found in my web portfolio janrburgos.github.io/portfolio

2010-06 – 2014-03

Bachelor of Science in Marine Engineering

John B. Lacson Colleges Foundation – Bacolod

- One of the 60 students who received a scholarship from Norwegian Shipowners Association Cadetship Program among hundreds of other applicants in our batch.
- Had an internship onboard an international vessel at Gearbulk as an Engine Cadet during my 3rd year in college.
