Summary

I'm a former Marine Engineer with over 5 years of experience working onboard international vessels. I shifted to a web development / programming career because I want to grow and succeed in a career in which I am passionate in doing while creating something that would make people's lives easier. I believe that I have skills which I acquired from my previous experience as an engineer which I can bring into my next profession as a programmer / developer.

Key Skills

• Quick Learning • Critical Thinking • Troubleshooting • Problem Solving • Adaptability •

• Resourcefulness • Attention to Detail • Team Player • Integrity •

Experience

2015-04 – 2020-12

Officer-In-Charge – Engineering Watch
BW Shipping Philippines, Inc.

- In charge of maintenance, overhauling, repairing, and carrying out tests of marine equipment and machineries in order to keep them efficiently running at +99%.
- Preparing requisition orders of needed spare parts of machineries while also ensuring that costs are economically sound.
- Supervise and train other crewmembers (20+ crewmembers per contract/year) during routine duties and emergency drills about topics related to safety, technical work related to the job and et cetera.

2012-06 – 2013-05

Engine Cadet
Southfield Agencies, Inc.

- Had my internship onboard an international vessel as an Engine Cadet during my 3rd year in college.

Education

2021-02 – Present

Full Stack Web Development Course
Uplift Code Camp

- Coding bootcamp focusing on the MERN Stack.
- My projects made from this bootcamp can be found in my web portfolio janrburgos.github.io/portfolio

2010-06 – 2014-03

Bachelor of Science in Marine Engineering
John B. Lacson Colleges Foundation – Bacolod

- A Scholar of Norwegian Shipowners Association Cadetship Program and Dean's Lister.
